Review & reconstruction of financial statements

What we do

Through RSM's sound approach and methodology, you can be confident that you will receive more than just numbers. We can bring value beyond performing an annual compliance function. This may include spotting potential trouble areas and hidden opportunities, cost efficiencies, profit maximisation, etc.

Our approach is unique to differentiate ourselves as we take time to understand your business, requirements and expectations to deliver a seamless and efficient delivery of compliance. We make sure that we allocate the right level of staff so that issues with significant impact on the financials are identified, discussed and dealt with in advance. The team also co-ordinates with the other consultants on routine matters to save your time. Our auditors are trained to keep communication channels opened, notifying on difficulties encountered, discussing any matters arising from the audit to reach agreements to matters arising and adjustments to be passed. Most importantly, we meet the deliverable timeline with our personal approach which is assured throughout the audit.

Our experience

Manufacturing - includes companies with annual turnover in excess of RM200 million, and asset capitalisation exceeding RM300 million. Among our larger manufacturing clients are those involved in the manufacturing of wood-based products, latex examination gloves, garments, vacuum formed plastic products, specialised flooring materials, automatic barrier systems, conveyer systems.

Construction - includes major local and foreign contractors, including foreign contractors undertaking major infrastructure contracts in Malaysia. The project values of some of our major contractor clients exceed RM 1 billion.

Trading and retail - includes foreign conglomerate buying houses, traders of heavy equipment and consumables, departmental stores, garment retailing, fast food restaurants etc. Some of our clients have annual turnover in excess of RM 300 million.

Family-owned businesses - includes high value securities and property investment holding companies, trading and manufacturing companies, cottage industries, including wine making.

Housing development - includes projects covering thousands of units of landed and high rise housing units. Certain mixed development projects comprise industrial, commercial, and residential development, golf courses and recreation club houses.

Service Industries - includes professional consulting companies (in the fields of medicine, architecture, engineering, etc), education and training services, telecommunication services, manpower supply, recruitment companies, management services, toxic waste management services, property management services, real estate agents etc.
